
IBM SKILLSBUILD FOR UNIVERSITY ENGAGEMENTS

Meet Your Instructor – Vignesh Muthuvelan

Job Role: Master Trainer

Experience: 5+ Years in Tech Training & Curriculum Development

Professional Summary

- Conducts engaging sessions on Front-End Web Development: **HTML, CSS, JavaScript, Bootstrap, ReactJs.**
- Facilitator of programs in **IBM Cloud, Python, AI, ML, DL, R Programming, UI/UX, Gen AI**
- Experienced in teaching diverse audiences: **Arts & Engineering students, faculty members, and working professionals.**
- Delivers training in both **online and offline** formats
- Strong emphasis on **hands-on learning**, conceptual clarity, and career alignment

<https://www.linkedin.com/in/vignesh-muthuvelan>

EDUNET FOUNDATION

About Us

- **Founded in 2015**, as a not-profit. Registered u/s 12AA and 80G of Income Tax Act
- Thematic Areas of Engagement: **Education and Skilling**
- Large network of institutions enabled **through academic and government partnerships**
- **Special Consultative Status with the Economic and Social Council (ECOSOC) of the United Nations since 2020**
- Extensive experience of **content development, capacity building, implementation** etc.
- **Over 650,000** learners directly impacted since 2018 through our programs
- We are Great Place to Work Certified – **3 Years in a row!**

What do we do

- **Programs across academic spectrum** – for schools, vocational institutes, for technical or non-technical colleges & for out of education learners
- **We have a NICHE!** - Technology anchored education / skilling programs which leads to better employability in tech enabled job roles.
- Majority of our program audiences represent beneficiaries from Tier 2/3 colleges and cities. Some programs have focus on beneficiaries from EWS categories as well
- Drive implementation of CSR programs from corporates – **IBM, Microsoft, SAP, Vodafone Idea Foundation, Ernst & Young (GDS), LTIMindtree, TCS, Aditya Birla Group** etc.

Why this Program?

An estimated 85 million jobs may be displaced by automation by 2025 – “World Economic Forum”

Current Job Market:
The job market is experiencing an increasing demand for technical skills, driven by rapid advancements in technology. IBM Skills Build for University Engagements equips students with the necessary expertise to meet these demands and thrive in the digital age

Our programs are specifically designed to equip you with the essential digital skills and knowledge required by employers today

Preparation for the Digital Age:
As technology becomes more integrated into every industry, it is crucial for students to be prepared for the digital age. IBM Skills Build for University Engagements ensures students are equipped with the latest industry-aligned skills, essential industry tools and knowledge to succeed in a technology-driven world

Industry-relevant projects that simulate the challenges and demands of the workplace. These projects enable you to demonstrate your skills, problem-solving abilities, and ability to deliver tangible results

Rewarding Career Opportunities:
Industry-aligned skills are essential for students to secure rewarding career opportunities. The program provides hands-on experience using real world problem statements and practical knowledge in areas such as cloud computing, artificial intelligence, and machine learning, Data Analytics, Quantum computing and Cyber Security enhancing students' employability and opening doors to exciting career prospects

HOW TO DO THE COURSE ON SKILLS BUILD

ESTIMATED TIME: 5 – 10
MINUTES

**Go to incognito mode , take a new tab ,
enter this URL.**

**mail.edunetmail.com , by this URL we login
into Zimbra inbox**

Zimbra inbox login

<https://mail.edunetmail.com/>

This is your Zimbra login interface , now enter user name(its end with edunetmail.com) and password provided by edunet

The image shows a login form for the edunet foundation. The form is set against a blue background. At the top left is the 'edunet foundation' logo. Below it are two input fields: 'Username:' and 'Password:'. The 'Password:' field is masked with dots. To the right of the 'Password:' field is a checkbox labeled 'Stay signed in' and a 'Sign In' button. Below these fields is a 'Version:' label followed by a dropdown menu currently showing 'Default' and a 'What's This?' link.

IBM SkillsBuild

Get started by creating an IBMid

Sign-in update:

We've simplified how you access IBM SkillsBuild. You can now sign in using either Google, Github or an IBMid.

Returning users:

If you previously signed in with LinkedIn or "Log in with Email," you'll need to set up a new way to sign in to keep your progress. To continue where you left off, sign in with Google or create an IBMid using the same email address you used before. If you already have an IBMid with that email, just click "Log in." You're not creating a new account — just a new way to sign in.

New users:

To get started, sign in with Google or create an IBMid using your email address.

Email verification:

We'll email you a verification code. Check your inbox (and spam folder, just in case) for an email from IBMid (ibmacct@ibm.ibm.com), then enter the code to complete your sign-up.

About this module

What is AI?

What is the difference between AI and augmented intelligence?

Lesson 1 of 29

About this course

Do you know that artificial intelligence is everywhere around—on your smartphone, in automobiles, hospitals, and many other aspects of your life? Artificial intelligence records and analyzes things you do every day, and humans make decisions based on those things.

Artificial intelligence:

- Recommends merchandise you might like to buy on the internet
- Alerts you if your smartwatch or fitness band detects low oxygen in your bloodstream, inflammation, or an unhealthy spike in blood sugar
- Scans your social media posts to learn more about what you are thinking
- Helps banks invest money in your family's bank accounts to keep the economy around you growing

Mastering the Art of Prompting

START COURSE

IBM SkillsBuild

Welcome! This is an activity-based course. You'll learn about AI language models and the rules to follow when giving instructions, or prompting, an AI language model. You'll walk-through a guided activity that demonstrates how to write effective prompts for an AI language model to help plan a travel itinerary. Finally, you'll participate in an activity to apply what you've learned to effectively write prompts for an AI language model to create your own custom music playlist.

Museums and entertainment

A three-day itinerary

Lesson 1 of 21

About this course

Getting started

Artificial intelligence (AI) language models are a popular tool in natural language processing (NLP) that allows computers to interact with humans using natural language. The models are trained to understand and generate human language. These models use algorithms and machine learning techniques to:

- Analyze large amounts of text data.
- Learn patterns and relationships in the language.
- Generate new text that is similar in style and content to the training data.

Some of the AI language models include:

- ChatGPT, developed by OpenAI and backed by Microsoft
- Bard, developed by Google
- Hugging Face

AI language models are capable of generating complex sentences and paragraphs, answering
